

Experiment Information

Figure: Joint-action distribution
Game: Rock-Paper-Scissors
Feedback: Full information
Profile: BM-Hedge vs BM-Hedge
Horizon: 1,000,000
Replicates: 12
Seed: 42
Aggregation: Replicate mean

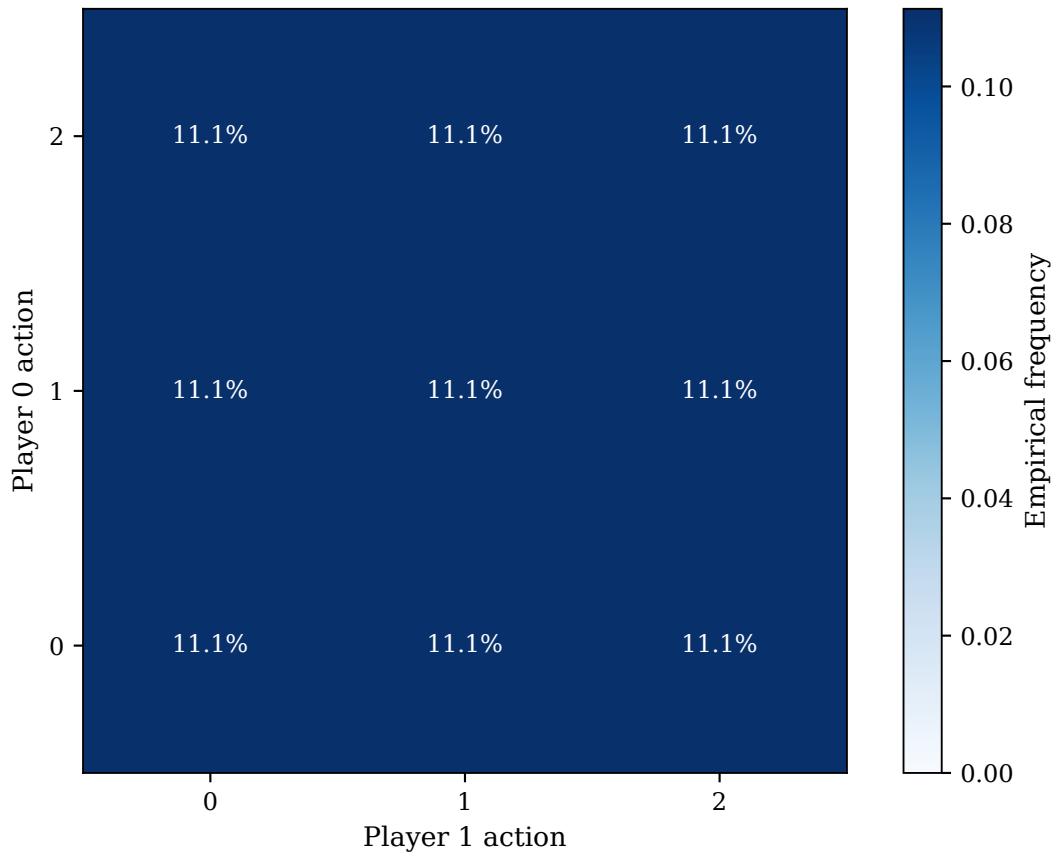

Experiment Information

Figure:	Equilibrium-distance convergence
Game:	Rock-Paper-Scissors
Feedback:	Full information
Profile:	BM-Hedge vs BM-Hedge
Horizon:	1,000,000
Replicates:	12
Seed:	42
Distances:	CE, CCE
Norm:	L1
Aggregation:	Replicate mean
Final equilibrium distance at T:	1,000,000
Endpoint statistics:	replicate mean, sample SD (ddof=1), SE=SD/sqrt(n)
CE:	mean = 0.00241643, SD = 0.000571418, SE = 0.000164954
CCE:	mean = 0.00174422, SD = 0.000542424, SE = 0.000156584

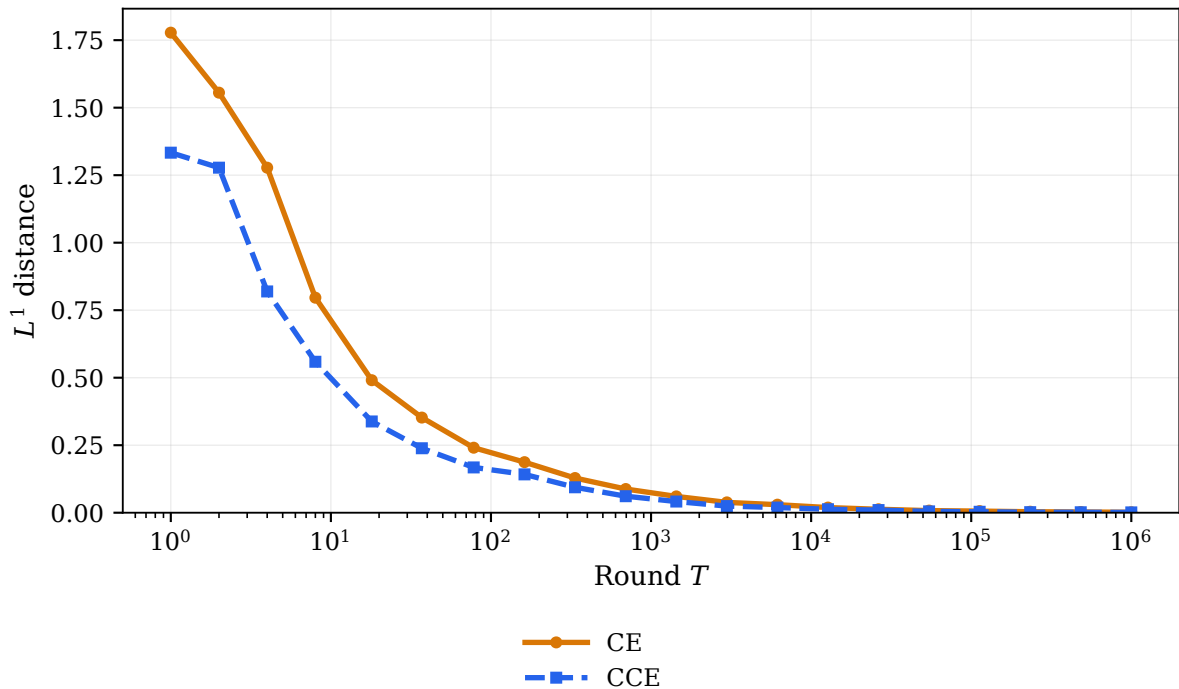

Experiment Information

Figure: Joint-action distribution
Game: Rock-Paper-Scissors
Feedback: Full information
Profile: BM-OptHedge vs BM-OptHedge
Horizon: 1,000,000
Replicates: 12
Seed: 42
Aggregation: Replicate mean

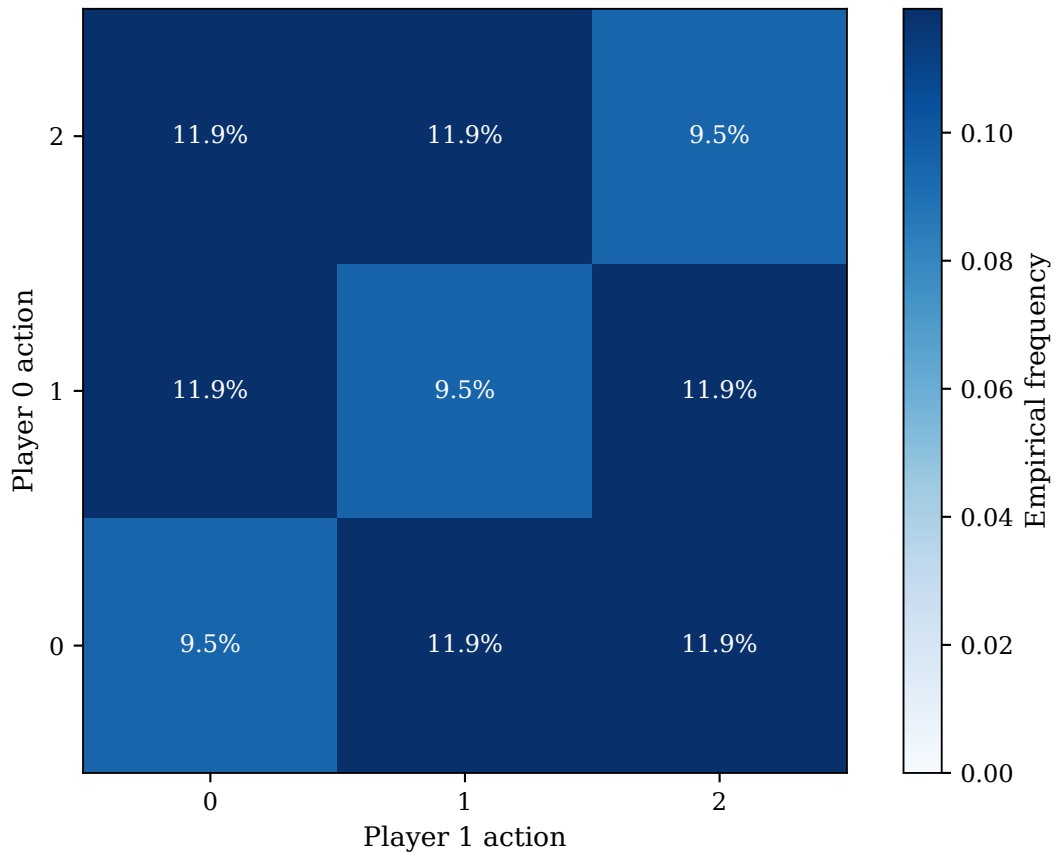

Experiment Information

Figure:	Equilibrium-distance convergence
Game:	Rock-Paper-Scissors
